Kirollos, Mariam, ['The Daughters of Egypt are a Red Line' \[1\]](#), Sur, Vol. 13, no. 24, 2016, pp. 137-153

This paper identifies the impact of rampant sexual harassment on Egypt's legal culture. As it had been vaguely defined in Egyptian laws and largely condoned by the society and justice system, sexual harassment increased over the years in both the frequency and in the intensity of its violence. As a result, legal initiatives and grassroots movements arose attempting to criminalise sexual harassment and end its social acceptability. With the fall of Mubarak, the human rights movements optimistically continued to call for an anti-sexual harassment law, but due to the continuing political turmoil, the struggle was more arduous than expected. Three years after the uprising, sexual harassment was finally criminalised and efforts to change public attitudes towards it continue, but the will of the state to enforce the law, beyond statements and promises, is yet to be proven.
