Shen, Yifei, [Feminism in China. An analysis of advocates, debates, and strategies](#) [1], Shanghai, Friedrich Ebert Stiftung, 2017, pp. 25

This study looks at feminism in China over the last century and reveals that feminist movements and arguments at most times have been linked to the nation's development. Independent and mass feminist movements like those in the West never developed in China. By taking a look at the realities of women and their images in contemporary China, the study shows that feminism in the People's Republic of China has still plenty of room for development.
