Watts, Jonathan, [Yes. We. Canopy: Can alliances between indigenous people and young climate activists help to save the Amazon?](#) [1], Guardian Weekly, 2019, pp. 15-17

Account of preparation by indigenous communities to resist the destruction of the rainforest by farmers, miners and loggers backed by far right President Jair Bolsonaro. The article focuses on the discussions, held in the small riverine community Manolito in Terro do Meio, between indigenous people and international activists, including Extinction Rebellion UK organisers, Belgian activists in the School Strike and from the Russian feminist punk group Pussy Riot. Watts outlines the wider Brazilian context, and discusses how international participants revised their ideas and campaigning plans as a result of the meeting, which was named 'Amazon: Centro do Mundo'.

Taylor, Matthew ; Watts, Jonathan, [Special Issue](#) [2], Guardian Weekly, 2019, pp. 11-16

A Special Investigation by Matthew Taylor and Jonathan Watts on the role of fossil fuel companies in promoting the climate crisis. Includes list of the 'top five global polluters': Saudi Aramco, Saudi Arabia; Chevron, US; Gazprom, Russia; ExxonMobil, US; National Iranian Oil Co.

Watts, Jonathan, [Yes. We. Canopy: Can alliances between indigenous people and young climate activists help to save the Amazon?](#) [3], Guardian Weekly, 2019, pp. 15-17

Watts, Jonathan, [Hydroelectric is not Clean Energy - it is Mixed with our Blood](#) [4], The Guardian, 2017, pp. 29-28

This article covers a major struggle for indigenous rights and environmental protection in Brazil, opposing construction of 49 dams on the Tapajos river and its tributaries to generate electricity and to create a canal to a major new container port. The scheme is backed by the Brazilian government and includes finance and engineering from Chinese and European companies, and would provide power to soya growers and mining companies. It threatens the home of the Mundurucu tribes and an area of pristine rainforest. The protesters gained a partial victory in 2016 when the Brazilian environmental agency suspended the license for one dam, but the local people fear renewed pressure.
