## **Rethinking Northern Ireland: Culture, Ideology and Colonialism**

Editor: [David Miller](#) [1]

Routledge, Abingdon, 1998, pp. 344

Aims, in words of editor, 'to give its readers a reasonably broad critical introduction to the Northern Ireland conflict'. Most of the 13 contributors to the book are academics working in the field of sociology, politics and media studies, plus writers and journalists. The thrust of the argument in the book is that the conflict needs to be understood as an anti-colonial struggle, not as a religious or ethnic one, and that tackling the inequalities brought about by colonialism is the key to securing a lasting peace.
