

Towards Nuclear Abolition: A History of the World Nuclear Disarmament Movement 1971 to the Present

Author: [Lawrence S. Wittner](#) [1]

Vol 3, Stanford University Press, Stanford CA, 2003, pp. 657

Traces the development of the movement in the 1970s, the rise of a new activism in the 1980s, the 'breakthrough' of the Intermediate Range Nuclear Forces (INF) Agreement of 1987, and the end of the Cold War. While noting later more worrying trends, Wittner concludes that 'This study – like its predecessors – indicates that the nuclear arms control and disarmament measures of the modern era have resulted primarily from the efforts of a worldwide citizens' campaign, the biggest mass movement in modern history'.
