

Swords into Plowshares, Volume Two: A Chronology of Plowshares Disarmament Action, 1980-2003

Foreword by Daniel Berrigan.

Editor: [Arthur Laffin](#) [1]

WIPF and Stock Publishers, Eugene, OR, 2010, pp. 110

This is the second volume of the history of the direct action movement launched by radical Catholics in the USA, whose tactics were taken up by Protestants and committed advocates of disarmament in both the US and Europe. Protests have over the years been directed at a range of ICBMs designed to carry nuclear warheads, Trident submarines, and nuclear weapons plants. This volume, which includes individual accounts and information on trials of protesters, covers actions not only in the US, but in Australia, Germany, the Netherlands, Sweden and the UK.
