

De-Growth vs a Green New Deal

July-Aug 2018

Author: [Robert Pollin](#) [1]

In: New Left Review, No 112, 2018

Pollin compares two radically different approaches to political and economic change to meet climate change, referring to the book *Degrowth: A Vocabulary for a New Era* (listed above) as representative of degrowth theories. He makes clear his own priorities are to secure massive investment in green energy and rapid progress in ending use of fossil fuels, rather than broad theorising about economic growth, or its opposite.
