## **The New Politics of Climate Change: Why We are Failing and How We Will Succeed**

Author: [Stephen Hale](#) [1]

In: Environmental Politics, Vol 19, No 2, 2019, pp. 255-275

Argues that governments, businesses and individuals acting alone cannot secure effective policies on curbing climate change, what is needed is mobilization by the 'third sector'. Hale suggests success depends on 'national leadership by a diverse coalition of groups; action at community level; a mass movement 'living differently and demanding more, and mobilization across borders'.
