

Climate Change: The Science, Impacts and Solutions

2nd edition

Author: [Barrie Pittock](#) [1]

Routledge, London, pp. 350 (pb)

Pittock, a well known Australian climate scientist, examines the scientific evidence for climate change, including new evidence in the 2007 Fourth IPCC Assessment Report of the rapid melting of arctic sea ice. He also covers the possibilities of investment in renewable technologies, and examines the role of the (in 2009) recently elected Australian government.
