Barkham, Patrick, [Can planting billions of trees save the planet? \[1\]](#), The Guardian, 2019, pp. 10-11

Barkham notes the major potential value of reforestation to limit global warming and preserve biodiversity as well as local economic benefits. But he also stresses the dangers of ignoring the importance of planting local species or relying on technologies that may require minerals under old forests. His article focuses on the role of the 'TreeSisters' charity founded in 2014, which funds tree planting in India, Nepal, Brazil, Kenya, Cameroon and Madagascar. In Madagascar the focus is partly on replanting lost mangroves (providing multiple environmental benefits).
